

CHANDRA PRAKASH REDDY

AWS DevOps Engineer | Terraform | EKS/ECS | Jenkins & GitHub Actions | Cloud Migration

Hyderabad, Telangana, India | +91-7989418515 | dodlaprakashreddy@gmail.com

[linkedin.com/in/chandra-prakash-reddy921260218](https://www.linkedin.com/in/chandra-prakash-reddy921260218)

PROFESSIONAL SUMMARY

AWS DevOps Engineer with 6+ years of hands-on experience designing, automating, migrating, and supporting cloud infrastructure across banking, telecom, retail, and publishing environments. Strong expertise in Terraform, Jenkins, GitHub Actions, Docker, Kubernetes, Amazon EKS/ECS, AWS networking, monitoring, and production operations. Delivered measurable results: **45%** lower infrastructure provisioning effort, **35%** faster incident recovery, **50%** lower manual deployment effort, and **18%** reduction in AWS spend.

TECHNICAL SKILLS

AWS Cloud: EC2, EKS, ECS, ECR, VPC, ALB, Auto Scaling, NAT Gateway, S3, RDS, EBS, IAM, Route 53, CloudFront, SNS, Cost Explorer, AWS Budgets

Infrastructure as Code: Terraform, reusable Terraform modules, VPC modules

Configuration Management: Ansible

CI/CD & Build: Jenkins, GitHub Actions, Maven, SonarQube, release automation

Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Amazon ECS, Helm, Kubernetes manifests

Monitoring & Observability: Amazon CloudWatch, Prometheus, Grafana, logs, dashboards, alarms

Scripting & OS: Python, Shell scripting; Ubuntu, RHEL, CentOS, Windows Server

Networking & Security: IAM, Security Groups, VPNs, firewalls, network segmentation, encryption, backup and recovery

Version Control & Other: Git, GitHub, SVN, Cron, Rsync

PROFESSIONAL EXPERIENCE

OTSI | AWS DevOps Engineer

October 2022 – Present

Concurrent assignments: FiberZ ISP and Bank of Maharashtra were delivered in parallel (Aug 2024 – Jul 2025).

Client: US Bank

July 2025 – Present

- Designed and automated AWS infrastructure using Terraform for enterprise migration of OpenLiberty and Keycloak applications, reducing infrastructure provisioning effort by **45%**.
- Owned AWS infrastructure delivery across Dev, IT, UAT, and Production environments using VPCs, public and private subnets, ALBs, NAT Gateways, EC2, EKS, and Security Groups.
- Built Jenkins CI/CD pipelines to compile OpenLiberty applications, create Docker images, publish to Amazon ECR, and deploy containerized workloads to Amazon EKS and ECS.
- Implemented CloudWatch metrics, centralized logs, dashboards, and alarms for infrastructure and application workloads, reducing MTTR by **35%**.
- Prepared migration runbooks, architecture documentation, and deployment procedures for environment cutovers, coordinating with development, network, security, and operations teams.

Client: FiberZ ISP

July 2024 – July 2025

- Designed Jenkins CI/CD pipelines for Business Support System (BSS) applications, automating build and deployment activities and reducing manual deployment effort by **50%**.
- Automated infrastructure provisioning and server configuration using Terraform and Ansible across RHEL, CentOS, Ubuntu, and Windows environments.
- Implemented Prometheus and Grafana dashboards for application and infrastructure monitoring, reducing issue detection time by **30%**.

Client: Bank of Maharashtra

August 2024 – July 2025

- Built an end-to-end Jenkins release pipeline to retrieve data from Windows systems, build on Linux, package WAR/JAR artifacts, deploy via SFTP, and automate cleanup, reducing manual release steps by **35%**.
- Automated data transfer, server synchronization, mirroring, and backups using Cron, Rsync, and Shell scripts, reducing manual operational effort by **40%**.
- Supported secure connectivity across 10+ on-premises endpoints (VPNs, firewalls, segmentation, access controls) and maintained SVN repositories for 15+ applications.

Client: Kalamandir

October 2022 – July 2024

- Designed and managed AWS infrastructure using Terraform; implemented GitHub Actions CI/CD workflows and Docker-based deployments on Amazon ECS and Kubernetes.
- Implemented IAM controls, encryption, network security, monitoring, Auto Scaling Groups, and load-balanced multi-region architectures for secure, highly available, business-critical workloads.
- Used AWS Cost Explorer and AWS Budgets to identify rightsizing and optimization opportunities, reducing monthly AWS spend by **18%**.

EARLIER CLIENT EXPERIENCE

Client: Oxford University Press

June 2021 – December 2021

- Provisioned AWS environments using EC2, VPC, EBS, AMIs, SNS, RDS, IAM, S3, Route 53, and CloudFront across multiple Availability Zones.
- Built Jenkins CI/CD pipelines with Maven and SonarQube, integrated Docker image builds, and resolved build and deployment issues affecting releases.
- Automated microservice onboarding with Python and Jenkins (job creation, Kubernetes deployments), reducing repetitive manual setup effort by **60%**.
- Managed Kubernetes deployments, scaling, manifests, and Helm releases; developed reusable Terraform VPC modules covering routing, gateways, Security Groups, and VPC peering.

PROFESSIONAL DEVELOPMENT

AWS Certified DevOps Engineer – Professional | In Preparation

EDUCATION

Bachelor of Arts | Dr. B.R. Ambedkar University, Hyderabad | June 2016
